

Guide to the province of Sevilla

Section Fuenteobejuna (Sevilla) - Alanís

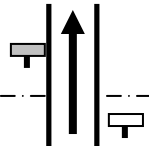

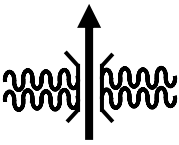

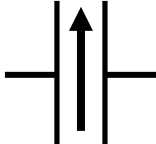

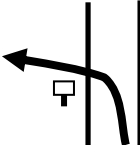

At the 3.3 kilometre point the route turns right onto a path signed as part of the *sendero de gran recorrido* (long-distance hiking trail) which leads to La Coronada. The path has been blocked in places by wire fences erected in the summer of 2008. Until this problem is resolved, we have to continue from the 3.3 kilometre-point on the same trail until it comes out onto the La Coronada-Argallón *pista* (trail) at the Fuente del Apio. Here are the more detailed instructions for this temporary detour.
